

JACK BAMIS

Web Developer & Designer

Phoenix, AZ (Remote) | vandalbamis@gmail.com | (509) 251-9617 | [linkedin.com/in/jackbamis](https://www.linkedin.com/in/jackbamis) | github.com/babyjupiter96

Web developer and designer who ships client work end to end — brand, hand-coded front end, copy, and the automation behind the site. Three live business websites delivered plus a custom AI chat widget in production. A B2B sales and revenue-operations background (CRM systems, funnels, landing pages) means the sites are built to convert, not just to look good.

SELECTED PROJECTS

Forge Digital weforgedigitalai.com

Founder & sole builder — brand, front end, AI integration, copy · HTML, CSS, JavaScript, LLM API

- Designed the brand system and hand-coded the multi-page marketing site: semantic HTML, one maintained stylesheet, responsive from 320px, keyboard-navigable.
- Built and integrated a custom AI chat widget wired to an LLM backend — it greets visitors, answers service questions, qualifies leads, and books calls.

Aphani Solutions aphanisolutions.com

Brand system, full site build, and copy — paid client · Deployed on Vercel

- Designed the identity, built the multi-page site for a sales consultancy, wrote all copy, and set up a Node component for form handling.

Coeur d'Amour Caregiver Services coeurdamourcare.com

Brand kit and six-page site from zero — new in-home care business

- Built the brand kit and full site mobile-first and accessible (semantic structure, strong contrast, large tap targets); wrote all copy.

Personal Portfolio

Next.js + TypeScript, hand-written CSS, scroll-based motion with a full reduced-motion path, per-project case studies. Deployed on Vercel.
